0154

NGC 752

Quick Facts:

Distance: 1300 Light-years. **Size: Approx 25 Light-years.**

Constellation: Andromeda.

An older cluster of about 250 stars, 60 visible in small scopes. Under very dark skies, it's just visible to the naked eye. With an age of over 1 billion years, there are many red giants and a few blue stragglers in the cluster.

Find it: Find Triangulum, then use its base stars to point at the cluster by extending this line 5 degrees. GOTO: NGC.
